ICWE aims to bring together researchers and practitioners from industry and academia to tackle emerging and interdisciplinary challenges in the engineering of Web applications using next-generation technologies, methods and tools which are becoming every day more critical for our society, education, media and culture.

The 16th edition of ICWE will accept contributions related to different dimensions of Web applications:

- Web application modeling and engineering
- Web applications composition and mashup
- Social Web applications
- Semantic Web applications
- Human computation and crowdsourcing applications
- Web of Things applications

Awards will be given to the best paper, the best student paper, the best vision paper, the best poster demo presentation, the best tool demonstration as well as to the top-10% papers according to the program committee review feedback.

Original papers must be formatted according to the Springer LNCS style and submitted in PDF through EasyChair:
<https://easychair.org/conferences/?conf=icwe2016>

The ICWE 2016 proceedings will be published by Springer LNCS.
