

Dear ICWE2016 Docker Tutorial attendee,

in order to be ready for the Docker setup, we kindly ask you to perform the following short tasks. Skip the prerequisites if you have them already on the computer you are going to use during the tutorial.

Prerequisites

- git on your terminal
- *OSX or Windows*: Docker Toolbox, <https://www.docker.com/products/docker-toolbox>. Then follow the getting started guide on the same page¹.
- *Linux*: 1) <https://docs.docker.com/linux/>, 2) <https://docs.docker.com/machine/install-machine/>, 3) <https://docs.docker.com/compose/install/>

Git clone

- `git clone https://github.com/ICWE2016DockerTutorial/ChangeDistiller.git`
- `git clone https://github.com/ICWE2016DockerTutorial/NodeJSApp.git`
- `git clone https://github.com/ICWE2016DockerTutorial/MongoDB.git`

Docker pull²

Reference: <https://docs.docker.com/engine/reference/commandline/pull/>

- `docker pull java:openjdk-7u101-jdk`
- `docker pull node:6.2.0`
- `docker pull mongo:3.3.6`
- `docker pull redis:3.2.0-alpine`

Looking forward to meeting and discussing with you!

The Tutorial Speakers
Jürgen Cito, Vincenzo Ferme, Harald C. Gall

¹ you can skip this step if you already have the Docker Beta (<https://beta.docker.com>) installed on your computer

² this way we speed up the download process of the images we are going to use during the tutorial
